

Cambridge International Examinations

Cambridge International Advanced Level

CANDIDATE NAME			
CENTRE NUMBER		CANDIDATE NUMBER	
MATHEMATICS			9709/72
Paper 7 Probability	& Statistics 2 (S2)		May/June 2018
			1 hour 15 minutes
Candidates answer	on the Question Paper.		
Additional Materials:	List of Formulae (MF9)		

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name in the spaces at the top of this page.

Write in dark blue or black pen.

You may use an HB pencil for any diagrams or graphs.

Do not use staples, paper clips, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer **all** the questions in the space provided. If additional space is required, you should use the lined page at the end of this booklet. The question number(s) must be clearly shown.

Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place in the case of angles in degrees, unless a different level of accuracy is specified in the question.

The use of an electronic calculator is expected, where appropriate.

You are reminded of the need for clear presentation in your answers.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total number of marks for this paper is 50.

(iii)	Explain why the use of the normal distribution is justified in carrying out the test in part (ii). [1]

5

The diagram shows the probability density function, f, of a random variable X, in terms of the constants a and b.

(i)	Find b in terms of a .	[2]
(ii)	Show that $f(x) = \frac{2}{a} - \frac{2}{a^2}x$.	[3]

7

A ten-sided spinner has edges numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10. Sanjeev claims that the spinner

(i)	Test at the 1% significance level whether Sanjeev's claim is justified.	
		•••••
		•••••
(ii)	Explain why a Type I error cannot have been made.	

In fact the spinner is biased so that the probability that it will land on the 10 on any spin is 0.5. (iii) Another test at the 1% significance level, also based on 9 spins, is carried out. Calculate the probability of a Type II error. [6]

Additional Page

If you use the following fined page to complete the answer(s) to any question(s), the question number(s) must be clearly shown.
