

## **Cambridge International Examinations**

Cambridge International Advanced Subsidiary and Advanced Level

CANDIDATE NAME								
CENTRE NUMBER					CANDIDATE NUMBER			
MATHEMATICS	;						9	9709/13
Paper 1 Pure M	lathema	tics 1 <b>(P</b> 1	<b>)</b>				May/Ju	ne 2017
						11	hour 45 ı	minutes
Candidates ansv	wer on t	he Questi	on Pape	r.				
Additional Mater	ials:	List of F	ormulae	(MF9)				

## **READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name in the spaces at the top of this page.

Write in dark blue or black pen.

You may use an HB pencil for any diagrams or graphs.

Do not use staples, paper clips, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

## Answer all the questions.

Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place in the case of angles in degrees, unless a different level of accuracy is specified in the question.

The use of an electronic calculator is expected, where appropriate.

You are reminded of the need for clear presentation in your answers.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total number of marks for this paper is 75.

constant a.

7

The diagram shows two circles with centres A and B having radii 8 cm and 10 cm respectively. The two circles intersect at C and D where CAD is a straight line and AB is perpendicular to CD.

(i)	Find angle ABC in radians.	[1]
(ii)	Find the area of the shaded region.	[6]

10 (a)

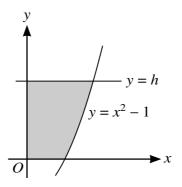

Fig. 1

Fig. 1 shows part of the curve  $y = x^2 - 1$  and the line y = h, where h is a constant.

(i)	The shaded region is rotated through 360° about the <b>y-axis</b> . Show that the volume of revolution, $V$ , is given by $V = \pi(\frac{1}{2}h^2 + h)$ . [3]
(ii)	Find, showing all necessary working, the area of the shaded region when $h = 3$ . [4]

<b>(b)</b>	
	Fig. 2
	Fig. 2 shows a cross-section of a bowl containing water. When the height of the water level is $h  \text{cm}$ , the volume, $V  \text{cm}^3$ , of water is given by $V = \pi \left(\frac{1}{2}h^2 + h\right)$ . Water is poured into the bowl at a constant rate of $2  \text{cm}^3  \text{s}^{-1}$ . Find the rate, in cm s <sup>-1</sup> , at which the height of the water level is increasing when the height of the water level is 3 cm.
	$h  \text{cm}$ , the volume, $V  \text{cm}^3$ , of water is given by $V = \pi \left(\frac{1}{2}h^2 + h\right)$ . Water is poured into the bowl at a constant rate of $2  \text{cm}^3  \text{s}^{-1}$ . Find the rate, in cm s <sup>-1</sup> , at which the height of the water level is
